RealQuad TF1X

The RealQuad Studio TF1X represents the latest iteration of its predecessor, the TF1. Engineered to exacting specifications the TF1X is made from Class "A" fire-rated plastic and passes all States fire codes.

The TF1X quadratic is a prime 7 with rated performance from 1Khz to above 4Khz with a smoother low frequency spectrum due to optimized cell structures. The new TF1X also sports a full 4" depth from front to back

RealQuad TF1X Specifications:
